Colours

Grille and frame: Brown sand 650

Colours can be selected from the RAL shades or other textured shades from the Akzo Nobel Futura range.

Presentation

The Pebbles tree grille is inspired by nature. The pebbles cuts are in different sizes and shapes and are randomly positioned.

Description

The tree grille is made of **two half grilles** and two half frames made of 6 mm thick S355 sheet steel put on a peripheral frame in zinc and powder coated steel, 6 mm thick. The shape of the frame is a corner piece.

For extra strength, the 2 half frames **can be reinforced** with 2 IPE reinforcements in the brackets screwed under the frame. The reinforced frame is anchored in the ground with anchor brackets.

This tree grille complies with regulations for persons with reduced mobility, so the width of the openings (holes and slots) is less than 20 mm.

For optimum protection against rust and long-term performance, the steel elements are zinc coated first, and go through our powder blast process (after having being cleaned and shot-blasted, the parts are coated with a primary layer of epoxy powder, followed by a second layer of polyester powder).

The assembly of the half-grilles is made with using stainless steel bolts.

12 sealing points for the peripheral frame (Ø 14 mm).

Delivered unassembled.
