

# Product sheet Mamba

## Product description

The Mamba is a rugged bicycle parking system which has recognizable design. The Mamba has a solid locking system so it is very suitable for outside areas that are not guarded.

## Distinctive features

- Front fork support so there is no damage to the wheel
- Heart-to-heart distance of 40 cm so there is enough space between the bikes which makes the system easier to use
- High/low-difference so the steering wheels don't interfere
- Integrated locking system so the bike can be easily locked to the system
- Round shaped base-plate which prevents dirt to stay between the system and makes it low in maintenance

## Models and measurements

Model	Number of bicycle places	Heart-to-heart distance	Width
Mamba 2 - single-sided	2	400 mm	800 mm
Mamba 4 - single-sided	4	400 mm	1600 mm
Mamba 4D - double-sided	4	400 mm	800 mm
Mamba 8D - double-sided	8	400 mm	1600 mm
Mamba Solitary high/low	1	-	-

## Technical features

- Standard galvanized under high environmental and quality standards. Optional: double painted in any RAL colour
- The protection sleeves are made of HDPE-plastic material and are hardwearing and UV-resistance

## Qualification

The Mamba is provided with the certificate FietsParKeur. This means the Mamba fulfils the requirements Foundation FietsParKeur demands to guarantee the quality of bicycle racks.
