

Table KG25

The Outdoor Table KG32 is a durable and practical solution designed for parks, gardens, picnic areas, and other public spaces. Manufactured from high-quality steel and natural wood, it combines a robust construction with a modern and functional design. The table is available in powder-coated or hot-dip galvanized and powder-coated finishes (RAL colour of choice)

For long-term corrosion protection, the steel frame is available either hot-dip galvanized (ISO 1461) or hot-dip galvanized and powder-coated in any RAL color. The seat and backrest are crafted from FSC-certified Linax pine, ensuring durability and low maintenance under varied climate conditions.

The table is supplied disassembled, the steel side elements are delivered separately and must be bolted to the main frame during installation.
