275/K4FB 900F

ANTI-TERRORISM FIXED BOLLARDS WITH BASEMENT

The fixed 275/K4FB 900F PILOMAT have been designed and built with architectural appearence similar to that of the automatic PILOMAT and therefore also allows the combined use of both versions.

Current models are the result of the dedication of more than 40 years in the field of access control and a twenty-year specialization in bollards.

GENERAL FEATURES

The fixed antiterrorism PILOMAT are used to separate and prevent vehicles from breaching the perimeter of the following areas: Research Centres Embassies, Police Headquarters, Military Bases, Ministerial Buildings Sites in Sensitive Areas. These items are designed to ensure antiterrorism defence, and must be cemented into the ground at a depth that meets the standards of breakout resistance.
