ABRI PLUS KNOW HOW

With over 3000 shelters sold per year, Abri Plus is a European leader in manufacturing urban structures

Located in Nantes on a site of over 4000m², we have the mastery of the whole production chain, from designing to installing the shelters.

We consider the protection of the environment as an indispensable part of our development. Abri Plus puts its words into action by being innovative and opting for an environmental management system that complies with the ISO 14001 standard.

All material used follow strict sustainable development procedures. Galvanised steel, glass and polycarbonate are both low pollution components and recyclable.

Proud of its design team, Abri Plus is increasingly involved in developing and designing a new generation eco-shelters, using materials that are ever cleaner, stronger and easier to install. We also work in partnership with architects to make the concepts reality.

Our logistic and planning service uses all procedures to guarantee the best delivery times, in all weathers!

Abri Plus takes particular care in manufacturing its shelters. They are exclusively produced at Saint-Philbert-de-Grand-Lieu, near Nantes, on a site of over 4000 m².

Abri Plus has the mastery of the whole production chain, from designing to installing the shelters.

OUR SUSTAINABILITY COMMITMENTS

LISTENING AND COUNSELLING

Tell us about your project !

By working as a true interface between the workshop and the customers, the Abri Plus contract managers are there to guarantee the success of your projects

INNOVATION

Design and functionality.

Proud of its design team, ABRI PLUS is increasingly involved in developing and designing a new generation eco-shelters, using materials that are ever cleaner, stronger and easier to install.

SUSTAINABLE DEVELOPMENT

Tomorrow starts today.

ABRI PLUS considers the protection of the environment as an indispensable part of its development. We put our words into action by being innovative and opting for an environmental management system that complies with the ISO 14001 standard.

WHEELIE BIN SHELTERS RANGE

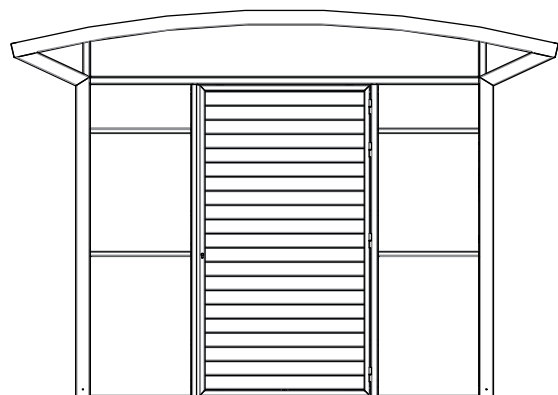

Simple and aesthetic solutions to hide wheelie bins !

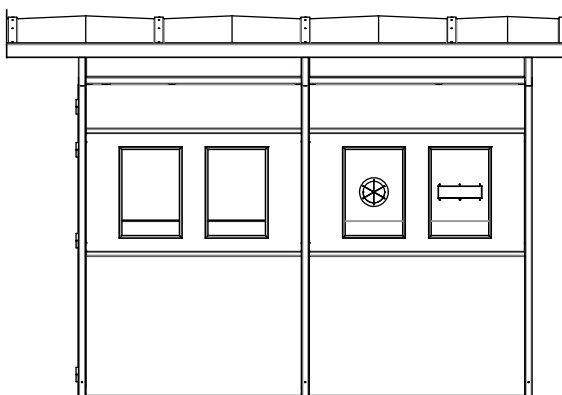

Today, the respect of the environment is a constant and daily priority for everyone. Thus garbage sorting is a solution that creates a rising amount of wheelie bins. Abri Plus developed a range of ways to hide your wheelie bins. Open or closed, with security or without, they are quick and easy to install. Our products are made of galvanised steel to protect and hide perfectly your wheelie bins and offer you a sustainable solution.

WHEELIE BIN DIMENSIONS

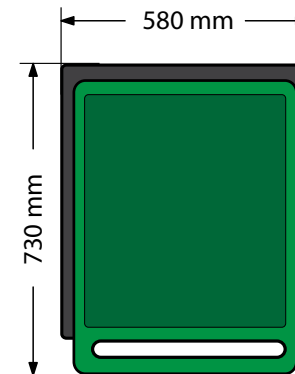

36

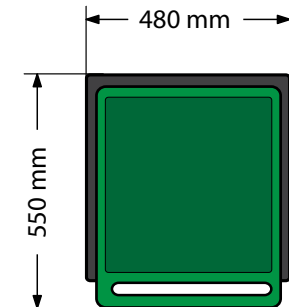

BACS 660 L et 770 L

BAC 360 L

BAC 240 L

BAC 120 L

Size your shelter.

From the sizes of containers above, you can evaluate the size of your shelter. Keep in mind the movement inside the shelter. A driveway wide enough will facilitate entry and exit of containers.

EQUIPMENT

Abri Plus offers additional equipment to improve service and make easier the use of your shelter. Lighting, locking system, access control, Shelter's cladding at the top, lockers, ashtrays ... we have what you are looking for!

“

Contact us to describe your project. We are here for you to share our know how and make it real.

”

Access control

Secured door

Lighting

Our selection of trendy colours!

Abri Plus has selected the most beautiful colours for your shelter in three collections.

URBAN includes neutral shades for a contemporary effect.

NATURAL offers a soft and warm palette for a perfect integration to the landscape.

POP brings freshness with tonic colors.

And if you don't find what you need in our selection, the entire RAL range is also available.

Matt, polished or sandblasted, three finishes are possible. Our favorite aspect : sandblasted for its durability and so contemporary finish !

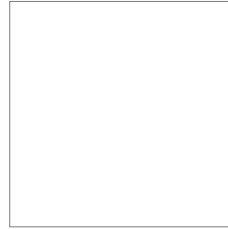

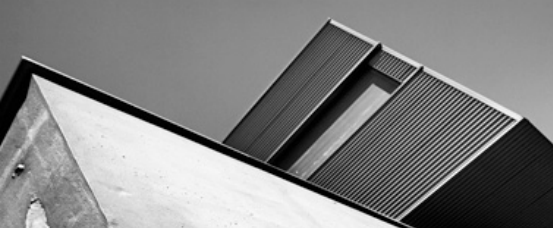

“

Our advice :

- > Observe the environment to determine the appropriate colour.*
- > Use a dark colour if you want to limit the visual impact of the shelter.*
- > Need of cheerfulness: choose Pop range for your accessories.*
